

# AQUA UNDERGROUND TANK

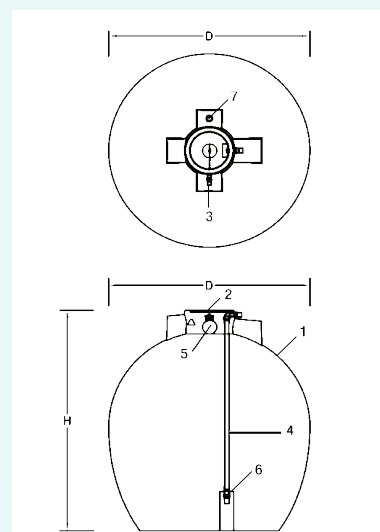

**AQUA Underground Tank** is suitable for storing water. For consumption and consumption, clean and hygienic, made from polyethylene material that has been cleaned and safe from the US Food And Drug Administration (FDA) Regulation 177.1520, which is strong and durable in use with certified standards ISO 9001.

Special with the design of the tank cover. The lock is closed tightly to the neck of the tank. Thus ensuring protection from insects and foreign matter into the contamination of clean water inside the tank.

Inside the water tank, AQUA has installed equipment for both foot valve and float valve. Just put the water tank in the ground and connect the water inlet and outlet and it can be used immediately.

MATERIALS	
Components	Materials
1. Tank body	Polyethylene (PE)
2. Cover	ABS (Acrylonitrile-Butadiene-Styrene)
3. Inlet pipe	PVC CLASS 13.5
4. Suction	PVC CLASS 13.5
5. Foot Valve	Brass
6. Float Valve	Brass
7. Vent pipe	Polyethylene
